## **IN HOUSE DIAGNOSTIC LAB**

Silver Creek Animal Hospital's in house diagnostic lab offers state of the art Abaxis equipment. We can perform fast and accurate lab analysis for sick pets, pre-surgical patients, early disease detection and medication monitoring.

Our in-house testing includes blood chemistry and electrolyte profiles, complete blood counts (CBC), urinalysis, parasite screens, heartworm testing, FeLV/FIV testing and cell cytology.

In addition to our wide range of in house testing, we work closely with offsite diagnostic labs to offer even more comprehensive testing when needed.
